

We made fingerprint pictures about butterflies. After we created the pictures we talked about the stories in our work and then wrote about them. Here are our stories:

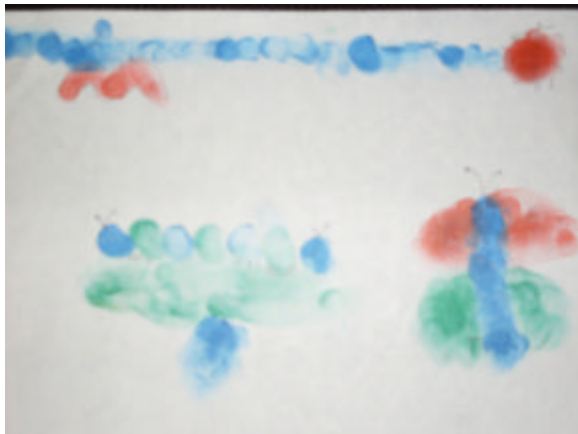

The caterpillar is crawling on the leaf. The sun is shining on the pupa and is making the pupa shiny. The newborn butterfly is learning to fly. The bird saw the caterpillar and the butterfly but the caterpillar saw the bird and made a terrifying stink. The bird just thought, "Eww!!!" and flew away.

By Maria

On a hot day there was a butterfly and a caterpillar. The caterpillar was crawling on the leaf. The butterfly was talking to the caterpillar. In the sky was a bird. The bird was going to eat the butterfly first. The bird was flying down to eat the butterfly. Because of the caterpillar the bird will eat the butterfly. Then the bird was eating the caterpillar and the butterfly laid more eggs.

By Grace

The caterpillar is eating the leaf.
The pupa is under the leaf.
The pupa is hatching into a butterfly.
Up in the sky there is a bird.
The sun is hot.

By Xinning

The caterpillar is crawling. The caterpillar eats leaves. The caterpillar sees a butterfly. The butterfly smiles at the caterpillar. A butterfly is in the pupa. The bird flies away. The sun is smiling.

By Anis

My story is about the butterfly and the caterpillar. A caterpillar is eating the leaf. The bird is trying to eat the caterpillar. The butterfly is flying up to the sky and the sun is smiling at the sky and another caterpillar is crawling on the wall.
